

## High Quality Terminal Style Keyboards for 5250 and 3270 Emulation Users

*The Affirmative YESboard 122 combines a standard 122-key terminal layout and Personal Computer keys for smooth transitions between PC and terminal emulation sessions.*

The YESboard 122 unifies PC and terminal emulation sessions. Too often, PC users engaged in terminal emulation are faced with a dilemma: how to work with 21 missing keys. The traditional 101-key PC keyboard simply lacks the size to incorporate vital terminal functions. As a result, users are forced to memorize awkward key combinations to compensate – slowing productivity and increasing frustration. The YESboard 122 overcomes the problem with an expansive 122-key layout for full terminal functionality. It still connects directly to and is wholly compatible with your PC. Corresponding terminal and PC functions are clearly labeled and color-coded on their respective keys for ease-of-use and smooth transitions between PC and terminal sessions. Each keyboard is durably constructed for reliable, quiet operation.

- Full function keyboard. Support for CMD or F keys 1 through 24, SYS RQ, ATTN, PRINT, TEST, RECORD, PLAY, HELP, HEX, ERASE INPUT, CLEAR, RESET, QUIT, BACK TAB, NEW LINE, DUP, JUMP, ZOOM, ROLL UP, ROLL DOWN, HOME, RULE, FIELD EXIT, FIELD PLUS, FIELD MINUS.
- 3270 model includes PA1, PA2, PA3, Field Mark, Cursor Select and EraseEOF keys.
- Compatible with all Affirmative Thin Clients.
- Optional software drivers available for most emulators.
- Dual-color-keyed captions. Terminal and dual usage keys are in black. PC captions are in blue.
- Choose rubber dome or tactile key switches.
- Switches tested to 25 million keystrokes.
