

# PRICOM 3100 Series

## EXTERNAL MINI PRINT SERVER

For more than a decade, silix technology has set the bar for leading edge print technologies. In fact, silix technology is the number one supplier of network printing solutions in Asia. Our secret? We're never content with our most recent success.

Introducing the PRICOM™ 3100 Print Server, the most reliable, high quality network print server on the market today. The PRICOM 3100 is easy to install, use and manage. The first to support the latest Internet protocol, **IPv6** and offers unique advanced security features that put users in control of printer access.

### COMPATIBILITY, FLEXIBILITY ARE THE NAME OF THE GAME

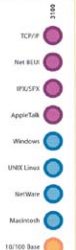

With the PRICOM 3100, compatibility is never an issue. It is configured with all the protocols necessary to connect in almost all network environments and is compatible with every common client operating system.

The PRICOM 3100 supports bi-directional communications, across many operating systems, with a wide range of today's popular printer models. In fact, this palm-sized, multi-protocol print server is compatible with common network system platforms and virtually all major printers using a parallel interface.

In addition, with the PRICOM 3100 Internet Printing Protocol (IPP) support, users can print to any accessible printer via the Internet.

### POINT AND CLICK SETUP, EASY TO MANAGE

The PRICOM 3100 Print Server's intuitive on-screen Wizard walks users through configuration, step by step. It's as easy as point and click. "Admin Manager" is the configuration utility included making it easy for the network administrator, or experienced user to manage multiple devices over the network. Additionally, the PRICOM 3100 monitors for and instantly alerts the network administrator to a variety of defined printer error conditions via a window message or email.
