

PRICOM H-260U for hp printers

INTERNAL EIO PRINT SERVER

The PRICOM H-260U is a high performance internal print server uniquely designed to connect two printers on the network; hp printers with EIO slots and any other USB printer. It is dual printer support for the price and convenience of one print server.

The PRICOM H-260U, a multi-protocol 10/100 TX print server, is fully compatible with today's network environments. It is ideal for today's businesses from SOHO to large office settings. It is also compatible with the hp Web JetAdmin utility for device control and management. The H-260U features leading-edge network capabilities such as support for the latest Internet protocol, IPv6, as well as access control using IP Filtering, a high level security feature that prevents unauthorized access to network printers.

WHY THE PRICOM H-260U?

- Compatible with hp printers with an internal EIO slot
- Supports hp Web JetAdmin
- No additional cost to add a USB printer to your network
- IP Filtering allows the network administrator to control who may or may not access a network printer
- Full featured protocols supported; TCP/IP, Novell NetWare, AppleTalk and the latest Windows*
- Multi-operating system support including Windows, NetWare, Mac OS and UNIX/Linux
- Built-in flash ROM for easy firmware upgrade
- IPP version 1.0 allows printing via the Internet

Are you networking two printers?

With 2 ports you can connect to network and hp JetDirect and a USB printer.
